Brief explanation of any of the figures reported above necessary to enable the figures to be understood:

Total revenue increased 27% with Aerospace Manufacturing increasing by 46% (excluding the Orpe system sale in the prior period), this was driven by strong Aerospace Manufacturing volumes with 35 shipsets of C-130J and 590 JSF parts.

The increased revenue delivered an improved Aerospace Manufacturing result, with the total business achieving an EBIT pre R&D costs and significant items of \$4.0 million, an increase of \$2.7 million over prior year, where FY15 also benefitted from \$1.4 million of higher grants.

The Aerospace Manufacturing business successfully qualified all Vertical Tail components and commenced initial deliveries in FY16. The business incurred \$0.6 million in start-up costs for vertical tails plus a buildup in working capital to support the greater volume.

The business increased investment in R&D, new technology and product development in the second half post the capital raise, with total investment of \$3.5 million for the year, an increase of 70% versus the prior year.

During FY16, the Group set up a new R&D and manufacturing facility at Waurm Ponds. Ford and initial Thales production commenced from this facility. This facility is now focussed on product development programs for both global aerospace and automotive customers as the business continues progress towards its strategy of being a composite components manufacturer for automotive and aerospace.

The business commenced the FY15 period with 120 full time equivalents (FTE) and has grown to 174 FTE at the end of June 2016. Headcount has increased to support both the Aerospace Manufacturing growth and additional R&D activities.

The Group successfully raised \$21 million net of costs in the first half and reduced debt by \$5.5 million, commenced the capital expenditure programs at Bankstown (Aerospace Manufacturing growth) and Waurm Ponds (automotive production and R&D). \$3.4 million of capex was spent in preparation for further growth, with year-end net assets of \$14.2 million versus \$(1.2) million in the prior year.

The Group incurred a loss of \$5.8 million after financing expenses. A number of significant items were recognised in FY16. These amounts total \$4.2 million and are set out in Part 8 of this statement. They relate to four main items – start-up costs for vertical tails \$0.6 million, restructuring of the management team \$0.5 million, indirect taxes relating to the German operation \$1.6 million and financing costs of \$1.5 million.

Financial expenses of \$4.6 million include \$2.2 million relating to treatment of interest for the Newmarket loan, other interest costs and the impact of fx revaluations and are netted off by financial income of \$1.0 million, which reflects a \$0.9 million gain from the revaluation of the Newmarket options.

The Group finished the year with cash on hand of \$7.6 million, in line with management expectations, with a net cash outflow from operating activities of \$4.9 million. This was largely due to increased inventory of \$5.9 million, of which \$3.0 million was for Aerospace Manufacturing growth, \$0.7 million relating to the KIST project and approximately \$2 million of safety stock held during capital implementation projects at Bankstown. This \$2 million is expected to be recovered by 31 December 2016.

Significant Items Notes	
(i) Vertical Tails start-up and qualification costs	Labour costs incurred and expenses for qualification of vertical tails prior to first sales revenue generation
(ii) Termination and Restructuring Payments	Termination and management restructuring costs of \$490K were made or provided in FY16.
(iii) Indirect taxes relating to German operations	Quickstep has recognised a provision of \$1,633K for potential underpayment of indirect taxes (social security, VAT and employment taxes) applicable to the employment arrangements of former management of the German business. These possible irregularities were recently identified by new Quickstep management, and the Company is currently in the process of determining its overall exposure, including its ability to recover amounts from third parties.
(iv) Financing Costs - Newmarket (Net Interest Expense & Options)	The net impact of the accounting treatment for the Newmarket loan using the effective interest rate method and the movement in the valuation of options associated with that loan was an expense of \$1,215K in FY16, compared with a gain of \$19K in FY15. This will continue to be a significant item until the Newmarket Options expire or are exercised.
(v) Reclassification of FCTR on finalisation of US entity closure	During the year the Group finalised the closure of its previous US subsidiary. As a consequence, the accumulated foreign currency translation losses have been recycled through the profit and loss statement.
