

# Quality Policy

Quickstep Technologies aim is to be a leading global provider of high quality advanced composite components, solutions and manufacturing processes, by using conventional composite manufacturing methods and by developing the innovative Quickstep solutions for our Customers where they benefit from improved cycle times, lower costs and a quality product.

Quickstep Technologies is totally committed to maintaining a Quality Management System which defines, aligns, manages, integrates and improves our processes.

This will be achieved through the following:

1. Providing customers, employees, shareholders with high quality product.

2. Creating an environment where employees are empowered to have ownership and personal accountability for maintaining and continuously improving the quality of their work, compliance to processes, and delivery of products.

3. Engaging and developing suitably qualified, skilled and experienced people to educate and train others to improve the skills, awareness and knowledge of Quickstep's quality systems and practices.

4. To have in place a framework where all individuals are able to challenge and continuously improve the business processes.

5. Establish, review and communicate performance measures that drive action to improve outcomes.

**We will strive to meet and exceed our customers' & shareholders' expectations in every aspect of Quality that is a result of the practices and outputs of the business.**
