

QUICKSTEP CONTINUES TO SUPPORT MICRO-X GROWTH

5 August: Quickstep (ASX:QHL) is delighted to announce a substantial follow-on order from Micro-X for the supply of carbon fibre chassis housings used in the world-leading Rover mobile x-ray machine. The Tonsley, SA based company is a leader in lighter and smaller electronic x-ray tubes and their Rover product is being used in the global fight against COVID-19.

The production program will take place at Quickstep's Waurn Ponds facility in Victoria, utilising the Qure proprietary carbon fibre manufacturing process and involves a number of product improvement initiatives.

Mark Burgess, CEO and Managing Director of Quickstep Holdings Limited said "we are delighted to continue our relationship with Micro-X on this impressive product and welcome the ongoing trust placed in our team at Waurn Ponds. There is real pride within the business that we are able to play a role in the Australian supply chain of

this important medical equipment company. Micro-X is a great example of the technology and advanced manufacturing capability which exists in Australia."

End
